Submit application via UW
CHASE Alliance at
<https://catalyst.uw.edu/collectit/dropbox/chaseall/11289>.

Application due dates:
For 7/2015 start – 12/15/2013
For 7/2016 start – 12/15/2014
For 7/2017 start – 12/15/2015

Admissions decisions are
made by February 1.

The University of Washington (UW) Centers for Comparative and Health Systems Effectiveness (CHASE Alliance) and the UW Department of Surgery's Surgical Outcomes Research Center (SORCE) are pleased to offer a NRSA T32 training opportunity in gastrointestinal surgery outcomes research. As part of the UW CHASE Alliance, the SORCE training program will focus on the development of well-trained clinical, outcomes and health services researchers with an emphasis on digestive disease interventions. This 2-year training program combines outcomes research experience and rigorous graduate level didactic training. Trainees will work closely with clinical content and research mentors and a three to four person advisory committee.

Trainees will be expected to:

- Complete a Masters in Public Health (MPH) through the UW School of Public Health and Community Medicine (or related degree)
- Develop skill sets in 5 core areas central to health services and outcomes research:
 - Administrative dataset analysis
 - Patient-centered outcomes and patient preference assessment
 - Health economics
 - Healthcare policy
 - Clinical research development
- Demonstrate consistent growth in the following areas:
 - Mastery of relevant scientific literature
 - Ability to identify and prioritize research questions
 - Ability to design research projects and evaluate their feasibility
 - Execution of multiple research projects, demonstrating mastery of broad research methods
 - Manuscript preparation, abstract writing, presentation at scientific meetings, and publication of research results
 - The ability to develop research programs and write competitive research grant applications

Candidates will:

- Hold an MD degree.
- Be currently enrolled in good standing in a postdoctoral clinical training program in surgery or a related field.
- Demonstrate a strong interest in a career in academic surgery, particularly within digestive diseases and/or obesity and nutrition.
- Be able and willing to commit 2 years to a post-doctoral training program.
- Be a US citizen, non-citizen national or permanent resident at the time of appointment.
