T32 Post-Doctoral Research Training Program in Gastrointestinal Surgery Outcomes Research

Contact Information:

David R. Flum, MD, MPH
Medical Director, SORCE
Professor of Surgery &
Associate Chair for Research
Department of Surgery
UW Department of Surgery
sorce@uw.edu

**All applicants, submit
application and
supporting materials at
<https://redcap.link/sor cet32>**

*(see SORCE web site for application form
and other requirements)*

**The application window
for a position starting
July 2022 will open on
3/15/21.**

**Applications will be
reviewed and admission
decisions made on a
rolling basis.**

The University of Washington (UW) and the UW Department of Surgery's Surgical Outcomes Research Center (SORCE) are pleased to offer a **NRSA T32 training opportunity in gastrointestinal surgery outcomes research.**

The SORCE training program will focus on the development of well-trained clinical, outcomes, and health services researchers with an emphasis on digestive disease interventions.

This **2-year training program** combines outcomes research experience and rigorous graduate level didactic training. Trainees will work closely with clinical content and research mentors and a three to four person advisory committee.

Trainees Expectations:

- Complete a Masters in Public Health (MPH) through the UW School of Public Health (or related degree)
- Develop skill sets in 5 core areas central to health services and outcomes research:
 - Administrative dataset analysis
 - Patient-centered outcomes and patient preference assessment
 - Health economics
 - Healthcare policy
 - Clinical research development
- Demonstrate consistent growth in the following areas:
 - Mastery of relevant scientific literature
 - Ability to identify and prioritize research questions
 - Ability to design research projects and evaluate their feasibility
 - Execution of multiple research projects, demonstrating mastery of broad research methods
 - Manuscript preparation, abstract writing, presentation at scientific meetings, and publication of research results
 - The ability to develop research programs and write competitive research grant applications

Candidate Eligibility:

- Must hold an MD degree
- Currently enrolled in good standing in a postdoctoral clinical training program in surgery or a related field
- Demonstrate a strong interest in an academic surgery career, particularly within digestive diseases and/or obesity and nutrition
- Be able to commit to a post-doctoral training program for 2 years
- Be a US citizen, non-citizen national or permanent resident at the time of appointment
