Objectives

- Discuss current issues and cases in health care ethics, including ethical challenges displayed in surgical care, particularly during pandemic times Understand the conflicts that arise in everyday clinical surgical practice, and highlight situations which can be better approached and solved with a surgical ethics view
- Employ skills in decision-making for clinical cases that present ethical problems
- Identify fundamental concepts and principles for the understanding of ethical issues in clinical care Discuss and utilize a Surgical Ethics framework and tools to assist in better decision making

Planning Committee Disclosure: Dr. Alberto Ferreres and the other planning committee members have no financial relationships to disclose.
